Mohammed Fawwaz Maniar

Senior Front End Developer · React, TypeScript, Angular

Markham, ON · fawwazmaniar@gmail.com · fawwazmaniar.dev · LinkedIn

SUMMARY

Front end developer with 9 years of software development experience, working in React and TypeScript. 6+ years at Jonas Software building data-rich Angular and TypeScript interfaces for BI products used by 13,000+ users. Modernizations I led cut key workflow times by up to 85%; I also build React prototypes and proofs of concept. Full-stack background in Node.js, C# / .NET, SQL and Supabase.

SKILLS

Frontend: React (Hooks, React Router, React Native), TypeScript, JavaScript (ES6+), Angular (NgRx, RxJS, OnPush, lazy loading), HTML5, CSS3, responsive design

State & Data: Zustand, TanStack Query (React Query), NgRx, RxJS, Supabase, REST API integration

Testing & Delivery: Vitest, React Testing Library, unit and integration testing, CI/CD pipelines, GitHub Actions, Git, code review, Agile/Scrum

Backend & Data: Node.js, C# / .NET Core, RESTful APIs, SQL (authoring & optimization), SQL Server, PostgreSQL

AI-Assisted Development: Claude, GitHub Copilot (agentic workflows, test scaffolding, debugging, code review)

EXPERIENCE

Senior Front End Developer | Jonas Software, Markham, ON | Sept 2019 – Present

- Support 4 teams, each building a different enterprise business intelligence product, driving work from technical planning to release and production support for 13,000+ users.
- Lead legacy-to-modern migrations (3 applications to date), including a vanilla JavaScript business intelligence app moved to Angular with NgRx and OnPush.
- Cut client portal wait times by modernizing data flows: ~85% faster work-order refresh, ~70% faster invoice inquiries (300 per-row checks collapsed into one paged call), and ~75% faster page navigation.
- Build data-rich reporting and analytics interfaces, including dashboards and multi-step workflows over large datasets.
- Build React prototypes and proofs of concept, and evaluate React against Angular in migration planning, comparing component architecture, state management, and performance.
- Mentor junior developers through code reviews focused on readability, testability, and maintainability.
- Partner with product owners to clarify requirements, rework technical specs, and flag risks early.

Web Developer | Alcohol Countermeasure Systems, Toronto, ON | Sept 2017 – Sept 2019

- Built client management applications with TypeScript and Bootstrap, ensuring cross-browser compatibility.
- Maintained and optimized production e-commerce sites with PayPal payment integration, and partnered with marketing on SEO and UI improvements.

PROJECTS

Plateau (React 19, TypeScript, Supabase) — Live workout tracker with a split builder, set logging, and session history. TanStack Query for server state, Zustand for app state, Postgres Row Level Security for data ownership, and an atomic Finish via a Postgres RPC. Vitest and React Testing Library tests, CI on GitHub Actions. Live demo · Code

Aethr (React Native, Supabase, Stripe) — Booking marketplace in testing on TestFlight and Google Play: separate consumer and provider apps with Google and Apple Sign-In, Stripe payments, Daily.co video sessions, and Google Places search. Website

EDUCATION

BSc, Computer Science | Trent University, Oshawa, ON | Dean's Honour Roll

Advanced Diploma, Computer Programming and Analysis | Seneca College, Toronto, ON
